## Geriatric Care Management Program

*Patient-Centered, Coordinated  
Care Management for Seniors*

The Geriatric Care Management Program is for those 60 years and older and offers comprehensive evaluation and care coordination for seniors and their caregivers.

This program helps to manage chronic illness and/or memory disorders in order to improve function and safety. After an initial assessment, a patient-centered geriatric care management plan is written to identify risks, goals and recommendations. The patient's primary care physician receives this plan as well as updated reports after home visits.

In addition to communicating with the patient's primary care physician, our advanced practice registered nurse assists elderly patients and their family caregivers to access necessary health education. She also provides referrals to Day Kimball HomeCare, Day Kimball HomeMakers and community-based services in order to coordinate and optimize all of these services.
