

## BEHAVIORAL HEALTH

## Inpatient Care

Our behavioral health services help people of all ages address a wide range of behavioral and psychiatric conditions. Our broad range of services supports you across the continuum of behavioral health care, from crisis services and intensive inpatient care to outpatient evaluations, therapy and counseling.

We also recognize that all aspects of health are interrelated, and we understand the importance of caring for the whole person. That's why we take a caring and comprehensive approach that's integrated with the rest of your medical care.

**Day Kimball Healthcare offers integrated, comprehensive care close to home. To learn more about all our behavioral health services, visit [daykimball.org/behavioralhealth](http://daykimball.org/behavioralhealth).**

Our inpatient behavioral health services provide short-term intensive inpatient care for individuals who have voiced or demonstrated an intent to hurt themselves or others, or who behave in a manner that is considered gravely disabled.

Located within Day Kimball Hospital, our Inpatient Behavioral Health Unit is a 15-bed secure unit, which means that individuals can be admitted on either a voluntary or involuntary basis. Patients served are primarily ages 16 and older.

Our inpatient behavioral health program provides continuous assessment and a coordinated, goal-driven treatment plan that is carried out by a multidisciplinary team of behavioral health professionals. The focus is on rapid stabilization of the acute symptoms.

Once stabilization has been achieved, clinicians will refer patients to appropriate follow-up care to continue their recovery. This may include referral to a partial hospital program, an intensive outpatient program, or therapy through our outpatient behavioral health program.
