

WOMEN'S HEALTH

As a woman, you deserve healthcare that's in tune with your unique needs—and delivered by people who understand them. That's why we've created a truly comprehensive and coordinated system of woman-centered care that covers the full spectrum of healthcare needs through every phase of a woman's life.

Our women's health professionals are dedicated to providing our full range of services in a manner that simplifies the healthcare aspect of your busy and multi-faceted life. We've even designed the facilities at our Birthing Center and women's health facilities to be exceptionally warm, welcoming and soothing—helping to provide you with a care experience that's both comprehensive and comfortable.

Day Kimball Healthcare offers integrated, comprehensive care close to home. To learn more about all of our women's health services and convenient locations visit daykimball.org/women.

Breast Health Program

The Day Kimball Breast Health Program promotes and supports breast health by providing exceptional mammographic services for early detection of disease and by helping patients to access further radiologic, oncologic and surgical care as needed. Our goal is to provide an efficient, comprehensive and compassionate multi-disciplinary approach to the detection, diagnosis and treatment of breast cancer.

A major component of the Breast Health Program is our nurse navigator. If a suspicious mass is found, a biopsy is scheduled. Once the biopsy has been performed, the nurse navigator steps in to act as a personal care coordinator, providing the patient and patient's family with the necessary resources and support to facilitate the next steps of care and to improve the overall experience.

The nurse navigator, as the name implies, navigates the patient through the healthcare system in the following ways

- ensures timely communication of biopsy results
- assists with scheduling further appointments as needed
- provides patient education, encouraging informed decision making
- remains a support system for patients who require further treatment through our Surgical Care or Cancer Care services
